PROFILE

Bachelor of Applied Science in Software Engineering graduate with hands-on experience building and maintaining Laravel/PHP backends, RESTful APIs, and MySQL/PostgreSQL databases across the full SDLC. Experienced in developing authentication, role-based access control, secure input validation, payment gateway integrations, email notifications, and cross-system API integrations. Comfortable working independently in remote, Agile environments using Git, with experience in Scrum-based collaboration. Uses AI-assisted coding tools such as Claude, ChatGPT, and GitHub Copilot to support development, debugging, code review, and documentation while maintaining code quality and maintainability.

CORE SKILLS

Languages: PHP, JavaScript

Backend & APIs: Laravel, RESTful API design, backend architecture, secure coding practices, debugging & performance optimization

Frontend: Tailwind CSS, Bootstrap CSS, JavaScript

Databases & Tools: MySQL, PostgreSQL, database design, Git, Docker, DBeaver, Agile workflow

AI-Assisted Development: Claude, ChatGPT, GitHub Copilot, Cursor; used daily for coding, debugging, testing, and documentation

Soft Skills: Leadership, Teamwork, Problem-Solving, Time Management, Public Speaking

RELEVANT EXPERIENCE

Fullstack Developer Intern, MyBTP Super App Web Based, Bandung Techno Park (Jul 2025 – Dec 2025)

- Developed the Laravel backend and Tailwind CSS frontend for MyBTP Super App to digitize external grant operations, letting the team manage grant workflows through one web-based platform.
- Built the backend system and PostgreSQL database, applying secure coding practices such as input validation to protect against common vulnerabilities.
- Debugged and optimized PHP/Laravel backend logic, and used Git/GitHub with AI coding assistants (Claude, ChatGPT) for version control and code review.

Project Manager & Fullstack Developer, Intellectual Property System (Campus Project), Politeknik Negeri Indramayu (Sep 2023 – Present)

- Led a 4-person development team, assigning tasks, tracking progress, and resolving technical blockers to keep delivery on schedule.
- Developed a Laravel and MySQL system with authentication and role-based access control, implementing secure session handling and input validation for structured, permission-based access.
- Designed RESTful APIs integrated with the Innovation Dashboard, and integrated a payment gateway with automated email notifications, cutting manual submission follow-up steps by roughly half.
- Conducted system analysis, database design, debugging, and functional testing across the full SDLC.

Fullstack Developer, Innovation and Research Dashboard, Politeknik Negeri Indramayu (Sep 2024 – Present)

- Developed and maintained a web-based dashboard using Laravel and MySQL for managing innovation and research data.
- Built Laravel RESTful APIs consumed by a companion mobile app, and improved data-submission reliability through AJAX-based validation and backend debugging.
- Owned feature planning, testing, and bug fixing to support reliable end-to-end data workflows.

ADDITIONAL EXPERIENCE

QA Manual Intern (Remote), Icbic (Jan 2026 – Jul 2026)

- Performed manual QA testing using Excel for test case documentation and Selenium for automated test scripts, strengthening problem-solving and debugging skills applied to backend work.
- Participated in weekly Scrum meetings while working fully remote, coordinating testing cycles with the development team.

EDUCATION

D4 Software Engineering, Politeknik Negeri Indramayu (2022 – 2026)

GPA 3.90/4.00
